Nature Recovery Workshop

A free workshop for UNISON members involved with the maintenance of a site or area of land

21 September
9.30 - 12.30 Derby

Run by Derbyshire Wildlife Trust's Nature Recovery Advisors, this workshop will explore how UNISON members can improve the management of their sites for Nature and people. The workshop will provide a basic overview of nature recovery networks and the value of better site management.

We will offer practical actions of how the management of sites can be improved, including examples of where Derbyshire Wildlife Trust have helped organisations to enhance their sites. Time will also be set aside for attendees to get advice on specific details or questions about their sites.
